About MetaBullish

This is the most Bullish token in the Metaverse and easily going to be the most Bullish token of 2021. There's no better way to end 2021 and begin your 2022 other than doing it in a #Bullish style. Wipe your tears from those slow rug hype tokens and jump on Dave's promising MetaBullish token.

MINT IT HERE

Well, you could call this your avatar NFT generator. An avatar maker where you can create a character by selecting your attributes (face shape, eyes, nose, ears, body shape, clothing, etc). After creating your character, you can mint it as an NFT. But if someone has created that likeness before, you can't mint that particular character, therefore you have to buy it to use it. The original creator will get a share of the sale.

Roadmap

Phase 1

- Introduction of MetaBullish
- Founder's doxx presentation video
- Organic awareness campaign
